BACKEND & DATA ENGINEERING

Hardworking and passionate job seeker with strong organizational skills eager to secure entry-level Data Engineering or Backend Engineering internship position. Ready to help achieve company goals.

KEY COMPETENCIES

Python, Java, C
Flask, Beautiful Soup, Selenium
Django, SQL, Vertex-ai
OOP, DSA, ML/AI, Backend Development, FullStack Development

Critical thinking skills
Excellent communication skills
Problem Solving Skills
Fast-Learner

PROJECTS & EXPERIENCE

Neutral: Detecting Conscious and Subconscious Biases in Hiring Decisions

- Developed tools using advanced machine learning models (Gemini, LLaMA, logistic regression) to detect and mitigate hiring biases.
- Built a Streamlit-based application to present findings, enabling HR professionals to identify and address biases effectively.

Ampu-Fitness: Safe Workouts for People with Amputations

- Led backend development using Flask for an AI assistant delivering personalized, safe workout recommendations for amputees.
- Utilized MongoDB, Llama-index, and GPT-4; implemented RAG and evaluated model performance with Trulens.

MalamaAI

- Created a web application using Next.js and Flask to detect skin diseases with a DinoV2-based model.
- Incorporated Llama 3.370b for accurate analysis and improved diagnostic precision.

Additional Experience

- Built a fully functional e-commerce web application using Django, demonstrating strong backend development skills.
- Developed multiple custom Discord bots with engaging functionality, leveraging API integration.
- Consistently held leadership roles in university teams, collaborating effectively and delivering successful projects across various domains.

EDUCATION & CERTIFICATIONS

UIT University, Bachelor of Software Engineering

Expected in 01/2026

- Status: In Progress
- Class highest GPA in Semester I
- Class highest in Programming Fundamentals
- Among top 5 in Data Structures & Algorithms
- 3.02 CGPA

Hackathons

- 6/57 in Bahria University's inter-institute Techathon (TeamName: Tecna's Tribe)
- LabLabAI's Assistant Api and Trulens Hackathon
- Google's Vertex AI Agent Builder
- LabLabAI's Langflow Hackathon
- LabLabAi's Lokahi HealthCare Innovation Hackathon

CERTIFICATIONS

Harvard University, CS50's Artificial Intelligence

Expected in 2/2025

- CS50's Artificial Intelligence
- Created an AI that is capable of playing minesweeper by itself by calculating probability at each step
- Working on a page rank algorithm that identifies the probability of relevance of each page in a corpus

Harvard University, CS50 Python

- CS50's Python
- Worked on nine problem sets and one final project
- Certificate
